

Q3/2026 PARTS PROMOTIONS

It's all about Digitalization

Take control of your fleet with real-time monitoring

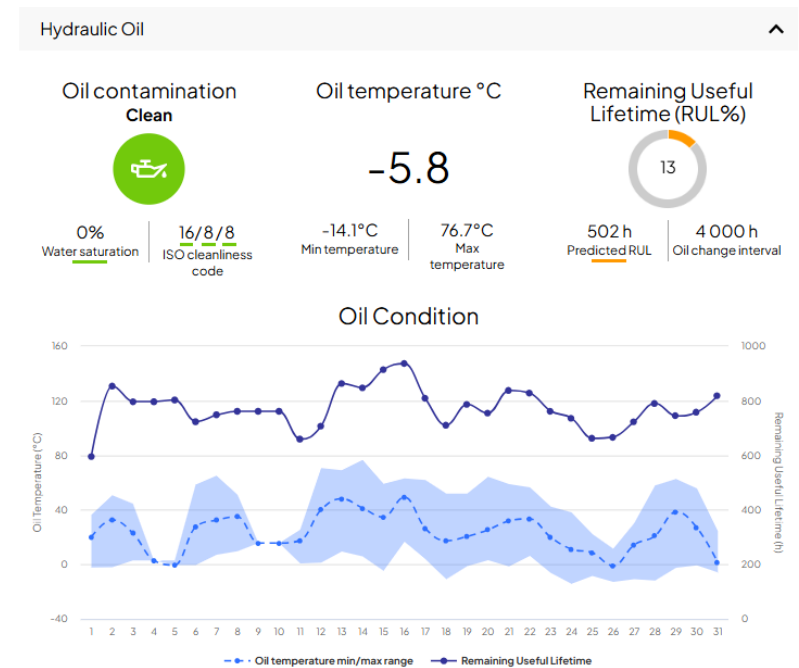

TRUCONNECT® Remote Monitoring is standard on all Konecranes lift trucks. Make sure it's active on your lift trucks to track their conditions and usage in real time. Get insights from your fleet data to optimize operational efficiency, increase productivity and reduce environmental impact.

The upgrade to TRUCONNECT® Premium+ is the natural next step to enable the monitoring of oil quality and contamination, changing the oil only when it's really needed. Take the first step towards condition-based maintenance instead of scheduled maintenance.

PARTS PROMOTIONS

Lifetime Advantage parts promotions encourage you to stock up on genuine Konecranes parts to ensure the maximum reliability and performance of your Konecranes lift trucks. Designed for Konecranes equipment, they can be guaranteed to meet or exceed all required standards.

TRUCONNECT Premium+

Upgrading to TRUCONNECT Premium+ you can monitor the conditions and extend the life of your hydraulic oil, making sure to change it only when it's really needed.

How do you know when it's the right time to change your hydraulic oil?

Condition monitoring sensors collect data on variables such as particles, water content and temperature to predict the remaining useful lifetime of the hydraulic oil.

With this option, you can extend hydraulic oil lifetime up to 3 times longer.

The hydraulic long-life filter can be retrofitted to any Konecranes forklift, container handler or reach stacker.

How to order

Send the lift truck's serial number(s)* to your Konecranes Lift Trucks distributor to receive an offer for the complete package including a **10% extra discount** for orders placed by the end of **September 2026**.

Safe, efficient and compliant weight verification

Weight verification isn't just a regulatory requirement; it's a crucial safety measure. Incorrect weight declarations can lead to improper weight distribution on vessels, creating significant risks to both cargo and crew.

That's why our SOLAS-compliant weighing system is designed to ensure every container's weight is verified and registered before it begins its journey across the seas. With this solution, we address weight-related challenges head-on, and help ensure safety is prioritized right from the start.

INTEGRATION WITH DIGITAL SYSTEMS

In addition to providing the weight value directly on the machine display, we provide an API interface that enables seamless integration with any system to share container weight data.

How does Konecranes container weighing system work?

The system weighs containers automatically during normal lifting operations using integrated load-sensing hydraulics. The operator simply lifts the container, holds it steady for a few seconds, and confirms on the display—no separate weighing step or special training required.

Within seconds, the system calculates the weight with high accuracy ($\pm 1\%$), alerts the operator to any overload risk, and generates a verified gross mass (VGM).

All weight data is then automatically transmitted to your KONECRANES cloud or directly into the customer's systems for monitoring, reporting, and further processing.

How to order

Send the lift truck's serial number(s)* to your Konecranes Lift Trucks distributor to get an offer with a **15% extra discount** for orders placed within **September 2026**.

Available options:

- EMC154 – In-cab system with local API
- EMC153 – Cloud-connected system with API

Software solutions

These solutions are designed to make your lift trucks smarter and more efficient—maintaining safety standards while safeguarding both your machinery and your team.

Equipment emergency control

- Dead man grip
- Empty seat engine shutdown

Rollaway protection

- Automatic parking brake
- Empty seat parking brake

Secure access

- Customized PIN code
- PIN code for attachment
- Operator login

Extended machine life

- Force neutral to extend transmission performance
- Proportional transport mode
- Delayed engine shutdown for turbocharger protection

A safer driving experience and wiser maintenance experience

Ensuring smooth and safe operations is essential for any business. Safety, comfort, productivity, cost efficiency, and data security are vital elements across all industries. Innovations that integrate these aspects are crucial.

Konecranes lift trucks already feature a range of safety measures designed to protect both drivers and nearby personnel, enhancing driving efficiency and overall productivity.

Our solutions are dynamic and continuously evolving, with new developments forthcoming. We are focusing on key areas to address the diverse needs of modern industry, offering benefits that truly matter.

How to order

Send the lift truck's serial number(s)* to your Konecranes Lift Trucks distributor to receive an offer for the complete package including a **20% extra discount** for orders placed by the end of **September 2026**.

[Order now](#)

Contact us

Contact your closest Konecranes Lift Trucks distributor and place your order within the end **September 2026** to benefit of an extra discount* on the campaign parts.

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the complete offer of the each package.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts
