

LIFT TRUCKS SPARE PARTS PROMOTIONS

It's all about Productivity

Q2/2022

Hydraulic Long-Life filter

Benefit from less downtime - due to fewer stops - and higher cost savings for your operation, increasing your overall productivity. And last but not least, you can reduce drastically the oil waste in the environment. All you need to do is as easy as retrofit your filter is.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get your offer for the complete package with a 10% extra discount* for orders placed within June 2022.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

- Enhance hydraulic oil control through the Konecranes automatic oil quality check on yourKONECRANES Customer portal
- Can be retrofitted to any Konecranes lift trucks

WHAT'S IN IT FOR ME?

- With TRUCONNECT Premium+ it helps predicting the remaining useful lifetime of the hydraulic oil
- Minimize oil waste and reduce maintenance cost
- Maximize savings and productivity

Make your oil last longer

Aren't you tired of wasting both time and money, replacing your lift truck hydraulic oil when it could still be used?

Thanks to the Konecranes Hydraulic Long-Life filter you can safely extend the life of your hydraulic oil up to three times longer than traditional filters would do. Moreover, with TRUCONNECT Premium+ you can monitor the status of the oil and schedule the changes when it's really needed.

Ensure your Control System is up-to-date

Did you know that the MDL2 electronic control unit has become obsolete and is no longer supplied?

It's well-known that repairing old electronic control units is difficult, time wasting and sometimes not 100% reliable.

It's time to ensure a safe and reliable Control System for your Konecranes lift trucks.

Control system update - MDL2 to MD4

We have developed a solution to easily replace the MDL2 with the new and up-to-date MDL4 control unit with an MD4 module (state-of-the-art of Lift Trucks Control Systems).

You can benefit of a modern Control System, with parts easily available and a new software.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get your offer with a 7.5% extra discount* for orders placed within June 2022.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

Avoid unexpected breaks

Few things affect productivity as much as unexpected service breaks.

With Konecranes Spreader kit 5000, the risk of twistlocks break is minimized by scheduling spreader maintenance every 5,000 hours, reducing downtime related to spreader faults and ensuring safe container handling.

Spreader kit 5000

Four twistlocks kits are part of the package together with the necessary wear pads. Plan your spreader maintenance every 5,000 hours and avoid accidents due to twistlocks fatigue, reduce risk of machine stop for a single wear pad replacement and have the right replacement ready to minimize downtime as much as possible.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the offer of the complete package with a 10% extra discount* for orders placed within June 2022.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

Get more mileage out of your tires

Do you have a wide yard and equipment manoeuvrability is not an issue?
Then why should you waste tires lifetime with your steering?

Steering wheel tire wear is between the highest maintenance costs in lift trucks operation. With Konecranes Tire Saver solution, you can increase your machine turning radius while prolonging your tires life.

Tire saver

Install the Tire Saver mechanical kit on your steering cylinder. When in place, it will limit the steering cylinder stroke, resulting in a larger turning radius and longer tire life.

Fewer tire replacements leading to less costs; less rubber waste and downtime. What else do you need?

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get an offer of the complete package with a 10% extra discount* for orders placed within June 2022.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

Optimize your lift truck operation time

Whatever is reducing maintenance costs is more than welcomed, right?

Then why not getting the main lift truck greasing points automatically lubricated?

Konecranes Automatic Greasing System is a direct line of lubrication available for a wide range of Konecranes lift trucks.

Automatic greasing system

Avoid risk of missing greasing points that might result into undesired mechanical blocking of any joint. If your lift truck was not ordered with automatic greasing since the beginning, you have the chance to buy the retrofit kit at a very special price.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get an offer of the complete package with a 10% extra discount* for orders placed within June 2022.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

Increase your lift truck operation time

Do you own a Konecranes Liftace reach stacker TCE5 version or the previous SMV 4532 TCE5?

If so, you have now the chance to increase your equipment operation time at an unmatched price. How?

By upgrading your hydraulic pump configuration to 2x105 cc.

Hydraulic pump upgrade - 2x105 cc

Both productivity and operation speed for lifting, extending, retracting and manoeuvring will increase with the replacement of the existent 105 cc + 75 cc with a 2x105 cc hydraulic pump.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get your offer with a 10% extra discount* for orders placed within June 2022.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

Contact us
