

LIFT TRUCKS SPARE PARTS PROMOTIONS

It's all about Digitalization

Q3/2022

**GET ACCESS TO
YOURKONECRANES.
COM**

- Look and compare the assets performance and operational KPI's
- Monitoring lift trucks usage and detect issues to optimize their performance, increasing reliability and availability, minimizing costs and operational risks.

Keep an eye on your lift trucks

- Monitor and maintain safety in operations;
- Get SMS/email notifications and reports of the most frequent fault messages and alarms, including category, total duration, first and last occurrence and description. It enables easier identification of potential maintenance future issues, and in turn reduces downtime;
- Use the asset maintenance forecasting application to reduce downtime and do the maintenance when needed;
- Monitor the performance and shocks related to load handled but also due to the driving operations;
- Enhance driver performance by identifying training needs for more economical driving and less impact on the environment.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get your offer with a 5% extra discount* for orders placed within end of September 2022.

*discount not applied or cumulated with other ongoing offers

Turn your Lift Truck Smart Connected

How are your lift trucks doing? Quite hard to guess, right? Well, at Konecranes Lift Trucks we have an easy way to discover that.

Activate TRUCONNECT® Remote Monitoring and track their conditions, usage in near real time and get insights to optimize operational efficiency and increase productivity.

Are you already Smart Connected?

You can't overstate the benefit of having your assets connected to monitor, analyze, understand & optimize with TRUCONNECT® reports on your KONECRANES.com. But let's run the extra mile and upgrade the equipment hardware to TRUCONNECT® Premium+.

Take your chance and order the kit **by the end of September 2022** with a 5% extra discount.

Maximize savings and uptime

In addition to all the Key Performance Indicators that can be monitored with the Basic and Premium packages, TRUCONNECT Premium + adds oil contamination and condition monitoring for hydraulic oil cleanliness (as per ISO 4406) and water saturation level.

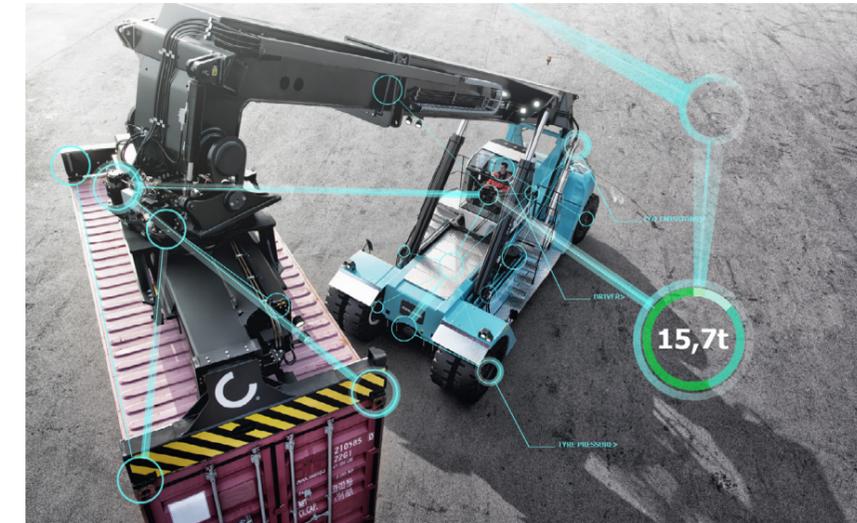

It also verifies the oil quality and ageing, so you can replace the oil when it is needed based on the indication of the sensor, not too early and not too late.

Hydraulic oil is a costly resource and harmful to the environment, so changing it only when needed can dramatically reduce maintenance costs and ultimately increase uptime, benefits that grow with the size of the fleet.

Let your reach stacker do the weighing

Handle the daily operations in a more efficient way. Verified container weight is more and more a mandatory requirement not only for shippers.

Hence, let's do it in a more productive way thanks to digitalization and technological progress.

Static Weighing System

The operation does not require any special expertise or training. The operator has just to lift the container and stand still for 5 seconds and tap a button on the MD4 display, to link the weighing data to the container ID.

In a blink of an eye you get an Automated Verified Gross Mass (VGM) declaration with 1% full scale accuracy.

We have two system options available:

- EMC154 in-cab with local API
- EMC153 with cloud API

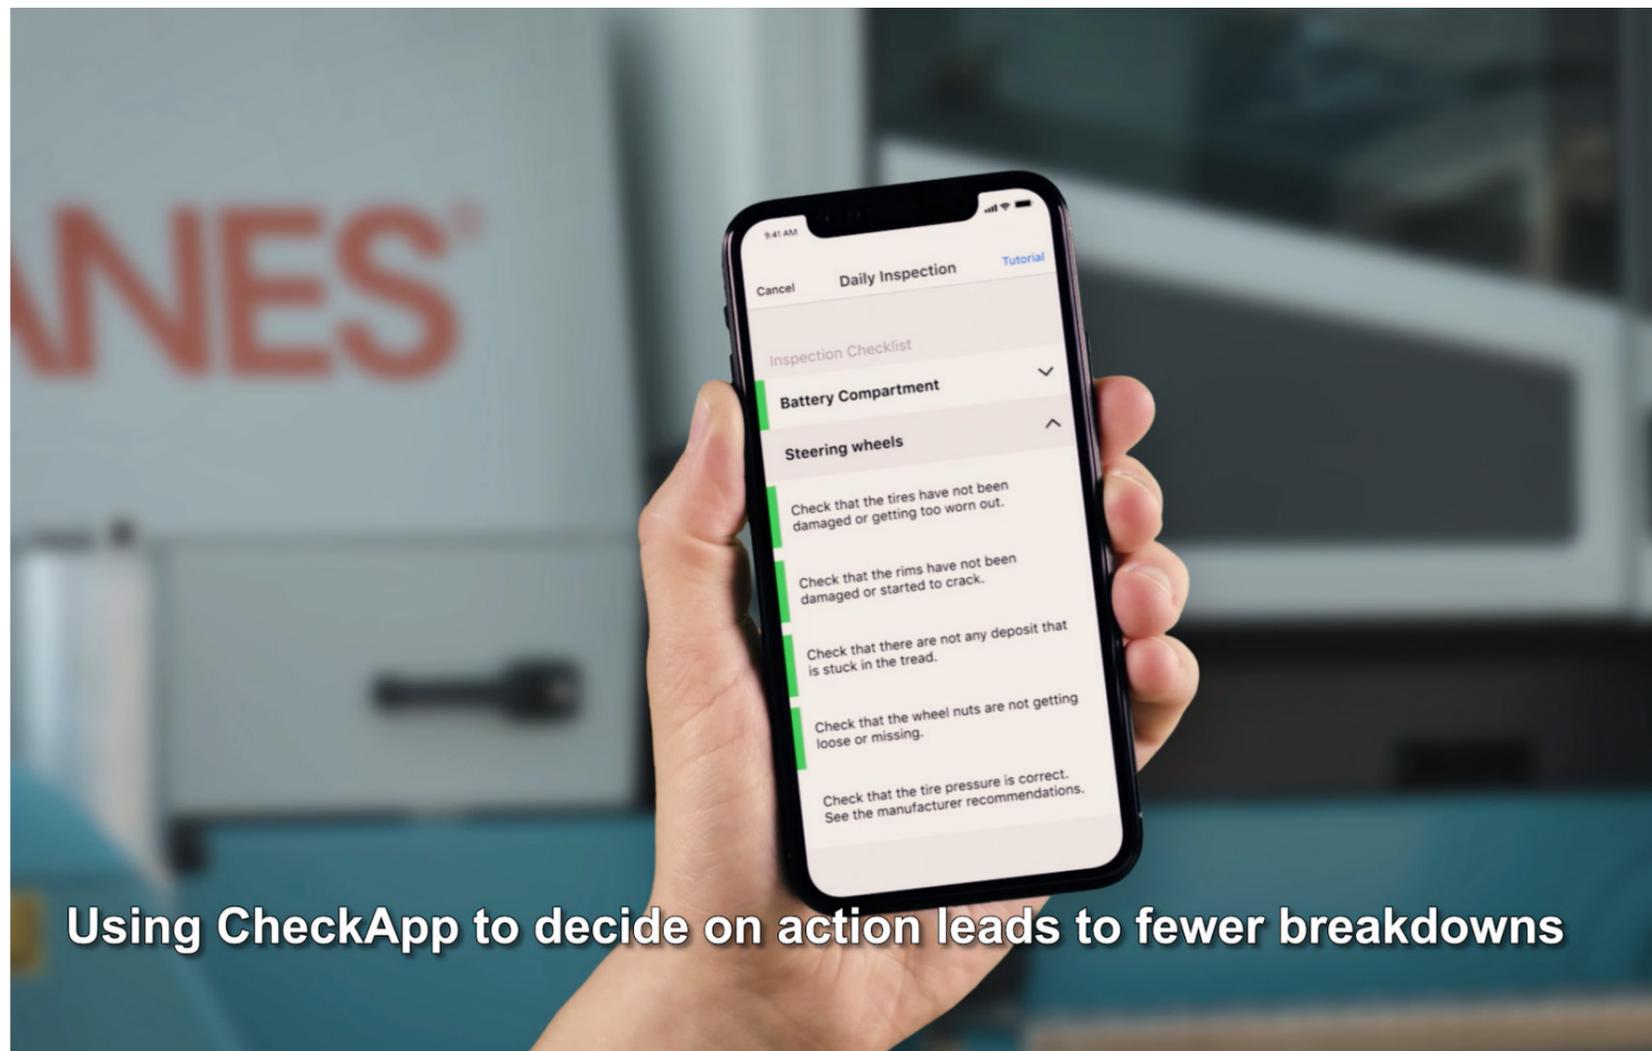

How to order

Take your chance and order the kit **by the end of September 2022** with a 5% extra discount.

Increase uptime and safety

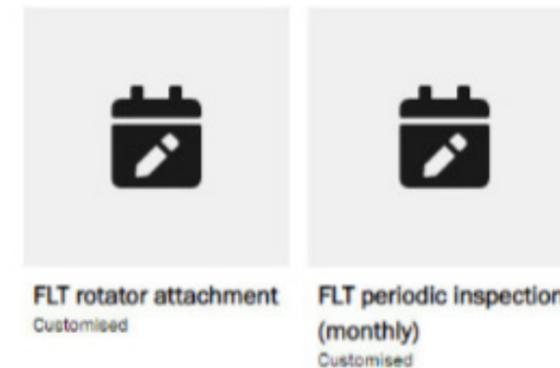

Lift trucks inspection is essential to the equipment integrity and operation. And making sure that the inspection results are spread quickly and to the right people is vital to take immediate action and increase both equipment uptime and safety.

With **Konecranes CheckApp** this is possible with just few simple clicks, regardless the brand of your lift truck, in an easy, fast and guided way.

Using CheckApp to decide on action leads to fewer breakdowns

Custom Inspection Checklists [+ Add new](#)

Keep your truck in good condition

The drivers can report issues by sending photos, comments, video or recording straight to yourKONECRANES.com.

If the lift trucks are equipped with special attachments or have specific maintenance interval requirements, the App allows the creation of customized checklists.

Grab this chance to not only store and share data, but also act on those data.

Konecranes CheckApp is available for download in digital stores for Android and iOS devices in 21 different languages. It can be used by all Konecranes customers that have a lift truck in their fleet. You will only need to get access to **yourKONECRANES.com** to register your equipment and have it visible on the App.

Contact us

Contact your closest Konecranes Lift Trucks distributor and place your order **within the end of September** to benefit of an *extra* discount* on the campaign parts. Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the best offer of the each package.

*discount applied only on day orders and not cumulated with other ongoing offers/ discounts
