

LIFT TRUCKS SPARE PARTS PROMOTIONS

It's all about Safety

Q1/2023

Stay safe from falling objects

Increase safety while operating your Konecranes empty container handlers by mounting the Over Head Guard - Safety cage to protect the operator from a falling object.

The safety cage structure is mounted all around the cabin. Lift trucks operate in busy environments and things can happen, accidents can occur. If heavy metal goods or containers fall from a high position, the effect of hitting an unprotected lift truck cabin can be disastrous.

Safety cage

A Safety Cage is a life saver in demanding environments. Konecranes Lift Truck Over Head Guard - Safety cage can be fitted on generation B & C Konecranes empty container handlers.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the complete offer of the package with a 5% extra discount* for orders placed within March 2023.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

Ensure safer container check-ups

Make sure your operators and service technicians get a secure working environment during maintenance operations.

By mechanically preventing the spreader (and container) to fall down, the container maintenance activities can be performed directly while the container is on the machine.

Container checking safety system

The system (red supports) is mounted on both sides of the mast. While activated, the system is locked mechanically in horizontal position, preventing the spreader to move further down. The service technician can also block the machine from moving by pushing a button placed on left fender; with the gear in neutral, there is no possibility to use the hydraulic functions (no lifting / lowering) during the check-up.

How to order

Contact your closest Konecranes Lift Trucks distributor and place your order within March 2023 to benefit of an extra 5% discount* on the campaign parts.

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the complete offer of the package.

*discount applied only on day orders and not cumulated with other ongoing offers/ discounts

Detect obstacles in time

When visibility is low, the reverse warning system can help prevent accidents by making the driver aware of obstacles in the lift truck's path. The ultrasonic obstacle detection system automatically senses objects, yard staff and other machines, and provides the driver with visual and acoustic alarm signals in the cabin. As the system relies on ultrasonic sensors, it performs well even in bad weather and poor light conditions.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the complete offer of the package with a 15% extra discount* for the reverse camera and a 10% extra discount* for the reverse warning system.

- Optimal for harsh conditions, less stress and more comfort for the drivers
- Can be retrofitted to all Konecranes lift trucks, as well as other manufacturers'

Get rid of blind spots

Ever wished you had eyes in the back when reversing? Our reverse camera kit can be positioned anywhere to prevent blind spots, helping the driver move large tonnages in a safe and efficient way. The camera combines a wide field of view with excellent image quality for reliable guidance. As it integrates with the existing cabin display, no extra monitor is needed.

INSTALL EXTRA EYES IN THE BACK

- Get 120° field view with excellent video quality
- Fully integrated in machine display
- Flexible mounting solution
- Easy to expand with multiple cameras

Protect drivers from demanding environments

Lift trucks operate in all kinds of demanding environments, such as those found in the steel and aluminum industries. Industrial areas are busy areas full of potential risks where accidents can easily occur. If solid metal items fall onto the truck because they are bumped or dropped, when they hit an unprotected cabin, the result can be very serious.

Grid cabin protection

Cabin protection can literally be a life saver, and is a small price to pay for better safety. This solution shields the operator from hard-to-see obstructions and falling objects, providing a safer working environment. Depending on individual requirements, the windshields can be mounted on the front or roof or both and on the condenser on the back as well.

How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the complete offer of the package with a 10% extra discount* for orders placed within March 2023.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

Avoid collisions in noisy workplaces

In busy and noisy situations, it's not always easy to spot a moving lift truck in time. The Blue Point Awareness system enhances safety by creating an extraordinarily bright spot on the ground a few meters ahead of or behind the lift truck, warning coworkers and other persons nearby that a lift truck is approaching. The visual warning is a simple but effective safety upgrade in environments where visibility is low and many people wear ear protection. Retrofit your lift trucks today to prevent collisions that may result in human injuries and unnecessary downtime.

Blue Point retrofit kit

The Blue Point Awareness system creates a bright blue spot on the ground, ahead of or behind the lift truck. The energy efficient, long life LED light is powered by the lift trucks engine, and available in different voltages. The automatic system fits all Konecranes lift trucks, and can be mounted in a rear and/or front position.

How to order

Contact your closest Konecranes Lift Trucks distributor and place your order within March 2023 to benefit of an extra 15% discount* on the campaign parts. Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the complete offer of the package.

*discount applied only on day orders and not cumulated with other ongoing offers/discounts

Contact us

Contact your closest Konecranes Lift Trucks distributor and place your order **within the end March 2023** to benefit of an *extra* discount* on the campaign parts. Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the complete offer of the each package.

*discount applied only on day orders and not cumulated with other ongoing offers/ discounts
