

Q3/2025 PARTS PROMOTIONS

# It's all about Sustainability

## Take control of your fleet with real-time monitoring

TRUCONNECT® Remote Monitoring is standard on all Konecranes lift trucks. Make sure it's active on your lift trucks to track their conditions and usage in real time. Get insights from your fleet data to optimize operational efficiency, increase productivity and reduce environmental impact.

The upgrade to TRUCONNECT® Premium+ is the natural next step to enable the monitoring of oil quality and contamination, changing the oil only when it's really needed. Take the first step towards condition-based maintenance instead of scheduled maintenance.

### PARTS PROMOTIONS

Lifetime Advantage parts promotions encourage you to stock up on genuine Konecranes parts to ensure the maximum reliability and performance of your Konecranes lift trucks. Designed for Konecranes equipment, they can be guaranteed to meet or exceed all required standards.

## TRUCONNECT Premium+

How do you know when it's the right time to change your hydraulic oil?

Upgrading to TRUCONNECT Premium+ you can monitor the status and extend the life of your hydraulic oil, making sure to change it only when it's really needed.

The filter can be retrofitted to any Konecranes forklift, container handler or reach stacker.

### How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get the offer of the complete package with a **10% extra discount** for orders placed within September 2025.

## Maximize savings while reducing waste

Tire wear is one of the highest maintenance costs in lift truck operations, and rubber waste poses significant environmental challenges. Our Tire Saver solution offers a practical way to increase your truck's turning radius, providing more mileage out of your tires when tight space maneuvering isn't a daily necessity

Benefits of Tire Saver:

- Boost productivity
- Reduce rubber waste
- Extend tire replacement intervals, lowering costs

## How does Konecranes Tire Saver work?

The Tire Saver is a mechanical kit installed into the truck's steering cylinder.

It limits the steering cylinder stroke, resulting in a larger turning radius and longer tire life.

This solution can be retrofitted into any Konecranes forklift, container handler, or reach stacker.

## How to order

Send the lift truck's serial number(s)\* to your Konecranes Lift Trucks distributor to get an offer with a **20% extra discount** for orders placed within September 2025.

## GET YOUR LIFETIME ADVANTAGE

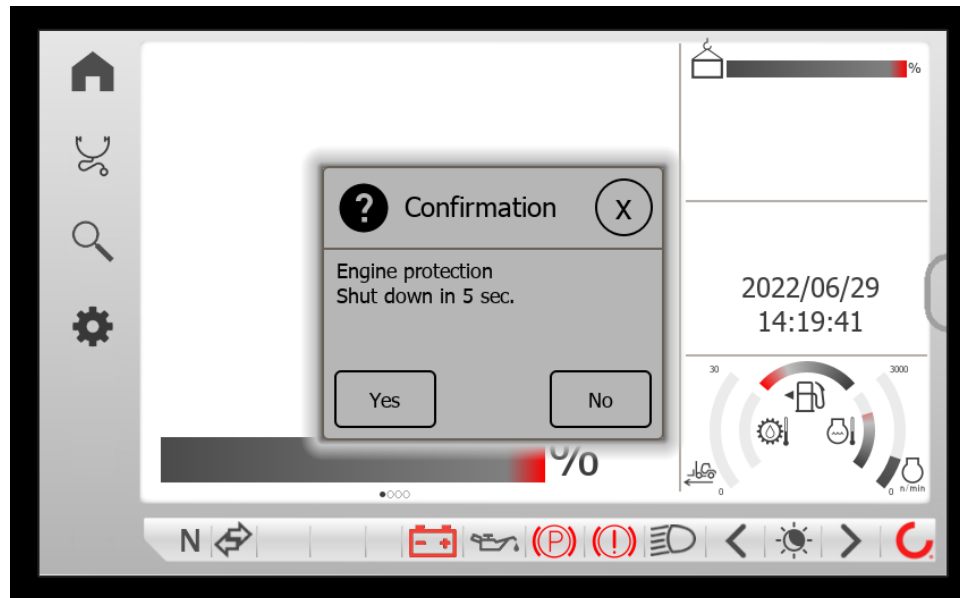

After you purchase a Konecranes lift truck, we offer you far more than just after-sales service. You can get resources for truck maintenance, fleet management, investment growth and safety enhancements, all backed up by a dependable support network. Because this is available to you for the entire life cycle of your equipment, we call it the Konecranes Lifetime Advantage. It's a better experience.

# Enhance engine protection with extra engine shut-down

Our advanced control system goes beyond the standard “Start and Stop” function, offering additional protection for your engine. When your truck is idling or the operator exits the cabin, you can now choose to shut down the engine based on critical parameters like engine temperature and oil pressure.

## Key features:

- Alerts the driver to high/low engine temperature and oil pressure
- Provides the option to shut down the engine, increasing its lifetime
- Minimizes downtime costs and activities
- Helps avoid extra emissions

## Extra engine shut down

The control system sends an alert to the driver, who can decide whether to continue operations or shut down the engine. A pop-up window allows the operator to choose between turning off the engine or keeping it running. This feature can be fitted on all Konecranes Generation C forklifts and empty container handlers equipped with the MD4 master display.

## How to order

Send the lift truck's serial number(s) to your Konecranes Lift Trucks distributor to get an offer of the complete package with a **20% extra discount** for orders placed within September 2025.
